PROJECTS

Fantasy Football Modeling

📅 January 2024 - February 2024

- Compiled and prepped 4 years of fantasy football projection data from 8 independent sources into a MySQL database
- Built a random forest model in scikit-learn that combined the disparate sources into one projection that ***outperformed the mean absolute error of the next best projection by 19%***

Movie Recommendation Engine

📅 December 2023 - February 2024

- Aggregated data from Rotten Tomatoes and used k-nearest-neighbors in scikit-learn to improve recommendation system for personal tastes
- Built visualizations in Tableau to show how ratings changed over time and how model was performing
- Saved an average of 22 minutes on movie selection relative to previous methodology

Market Analysis

📅 September 2023 - December 2023

- As part of a business analytics class, worked with a local metal manufacturer to research the competitive market
- ***Aggregated data from 28 sources*** to identify market gaps to potentially build and market a new industrial product
- Reported insights to manufacturer executives, which led to rethinking resource allocation, saving \$47K in vendor costs

University of Alaska Basketball Intramural Team

Captain

📅 September 2022 - December 2023

- Planned, scheduled, and led tryouts to maintain a team of 15+
- Organized a community outreach for the team to train at-risk high school students in basketball drills 10 hours per month
- Researched training practices and trends, and implemented 6 new drills that ***improved team agility by about 20%***
- Boosted morale, and led team to win 92% of total games

EDUCATION

B.S.

Mathematics and Economics

University of Alaska

📅 September 2020 - June 2024

📍 Anchorage

Relevant courses

- Probability & Statistics
- Linear Algebra
- Applied Econometrics
- Game Theory
- Calculus 1-3

SKILLS

- Programming: SQL, Python (Pandas, scikit-learn)
- Modeling: Linear and logistic regressions
- Data Visualization: Excel, Google Sheets, Matplotlib, Tableau
